

ANASTASIA GREEN

Game Designer & Developer

ana.daren.green@gmail.com | [linkedin.com/in/anastasia-green](https://www.linkedin.com/in/anastasia-green) | anadaren.github.io

SKILLS

Programming: C#, C++, Javascript, HTML/CSS, SQL, Lua

Tools & Frameworks: Unity, Unreal Engine 5 (C++/Blueprints), React, NodeJS, Express, MongoDB, Git, Blender, Autodesk Maya, Visual Studio, Adobe Creative Suite, Vite, Netlify, Figma

Other Skills: Software Development, Data Structures, VR/AR/XR Development, API Integration, Object-Oriented Programming, Game Design, Interaction Design, Environment Design, 3D Modeling, UI/UX Design, Prototyping, Usability Testing, Responsive Web Design, Agile, Visualization, Communication

EXPERIENCE

Adjunct Professor (Game Design) - The College of New Jersey

Spring 2026

- Ran a semester-long game production pipeline simulating a professional studio environment
- Designed and taught an upper-level, multidisciplinary game development studio course focused on Agile production, team-based development, and iterative design
- Led lectures, coding sessions, and collaborative design activities
- Oversaw creation and maintenance of design docs, asset lists, bug tracking, and project hubs
- Guided students through the complete development cycle of creating their own games, from prototyping to final pitch presentation

Summer Game Design Instructor - Stevens Institute of Technology

Summer 2025-present

- Developed a beginner-friendly curriculum focused on core gameplay principles, Unity 6 fundamentals, and C# scripting.
- Led lectures, coding sessions, and collaborative design activities.
- Guided students through the complete development cycle of creating their own games, from prototyping to final pitch presentation.

PROJECTS

in Fluorescence

Summer 2024

Role: Lead Developer | Unity | C#

- Oversaw programming, design, and implementation of a narrative-driven rpg.
- Created and implemented core gameplay mechanics using Unity and C#, integrating dialogue and environmental storytelling to enhance the game's atmosphere.
- Collaborated with artists and designers to ensure a cohesive visual and audio experience.

Integrated Design & Media MS Thesis "Something's Coming"

Spring 2023

Role: Sole Developer | Unity | C#

- Designed a Virtual Reality Art Game for the Oculus Quest 2, using Unity and C#.
- Scripted satirical and engaging dialogue and created a story that conveyed intricate themes of existentialism via environmental storytelling.
- Guided users through the experience at multiple showcases and worked through live user feedback.
- Ported game to PC and Mac for a wider audience.

EDUCATION

New York University - Tandon School of Engineering

August 2021 - May 2023

Master of Integrated Design & Media - GPA 3.8

The College of New Jersey

August 2017 - May 2021

Bachelors of Interactive Multimedia - GPA 3.3
